PROFILE

Passionate Python developer with expertise in building web applications using Django and creating GUIs with Tkinter and Kivy. Skilled in data scraping, data preparation, and proficient with Linux and shell scripting. Adept at front-end development with a strong grasp of HTML, CSS, and JavaScript. A self-learner with certifications from SoloLearn and extensive knowledge gained from various online platforms and books.

SKILLS

- Programming Languages: Python, C, HTML, CSS, JavaScript, Shell, Bash
 - Frameworks & Libraries: Django, FastAPI, Tkinter, Kivy, REST API
 - Databases: PostgreSQL, MongoDB, SQL
 - Development Tools: VSCode, Vim, Git, GitHub
 - Data Handling: NumPy, Pandas, Matplotlib
 - Operating Systems: Linux
 - Additional Skills: Data Scraping, Data Preparation, Responsive Design, User-Friendly Interfaces
-

EDUCATION

Self-Learning .

Certifications SoloLearn :

- Python Certification
- HTML and CSS Certification
- JavaScript Certification

Online Learning Platforms :

- Extensive learning from YouTube tutorials and various online resources
-

PROJECTS

Simple Web Applications:

- Developed user-friendly web applications using HTML, CSS, JavaScript, and Django.

Data Scraping Tools:

- Created tools with Python, using BeautifulSoup and Selenium for data extraction.

GUI Applications:

- Built desktop apps with Tkinter and Kivy to enhance user experience.

Shell Scripts:

- Automated tasks and managed Linux environments with shell scripting.

Programming Projects:

- Developed basic projects in C to strengthen programming skills.
-

INTERESTS

- Continuous learning through online courses and books
- Experimenting with new technologies and frameworks
- Contributing to open-source projects
